

# AWS Well Architected Review Services Sopra Steria Consulting Offer

## Benchmark your workloads to better serve your Business

Comprehensive evaluation based on AWS Well Architected principles and lenses, for providing industrialised, high-performing, resilient, secure, cost-efficient and sustainable business capabilities

### Solution Overview

Sopra Steria enables Digital Journey by advising, developing, migrating, modernizing, securing and managing applications on AWS.

While designing, building and operating workloads in AWS, our teams perform regular assessment, through Well Architected review. These evaluations, based on the AWS Well Architected Framework, focus on 6 pillars - Operation Excellence ; Security ; Reliability Performance Efficiency ; Cost Optimization ; Sustainability. Teams then identify gaps, quantify high-risk issues and develop recommendations for improving process, tools and team skills and collaboration.

### Advantages

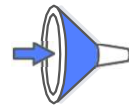

Performed by certified architected, through industry-led and consistent methodology, back by tool, these reviews help you:

- To get an exhaustive perspectives on your workloads, including specific lenses when applicable
- Prevent or remediate quickly high-risk issues, and improve workload quality and user satisfaction
- Create an improved sense of teamwork across your teams

### Customer Contribution

- Project context and documentation: vision, architecture diagrams, playbooks, runbooks
- Contributors to the review (Tech Lead, Architect, DevOps, Cloud Ops engineer) and participants to the Sum-up meeting

### Key Activities

Initial briefing to validate the internal sponsorship, the pillars to study, the required documentation and identify the team members to involve

Collaborative & pragmatic review with the team members, can be focalized on specific points of interest and include extra Lenses (3 to 6 hours)

AWS WAR service outputs and Statement of Work (SOW) publication, and presentation during a sum-up meeting

Support in the SOW implementation, review update and AWS funding unlocking

### Jumpstart Package Deliverables

The outputs of the WAR review are the following:

- A list of medium and high risks, extracted by the AWS WAR Service
- A synthetic SOW including the remediation items shared with your team
- A sum-up meeting to share all the findings with the involved stakeholders

Additional services delivered by our end-to-end Cloud Center of Excellence teams are :

- Implementation or support in the implementation of the Statement of Work
- Regular updates of the Well Architected review to take the continuous improvements into account
- Advisory on how to get the corresponding AWS funding if conditions are met.
